

Project: Bahrain City Centre Project – GN 3416 – Water Park Waterproofing
Client: Majid Al Futtaim
Contractor: CEBARCO
PMC: MACE International
Location: Manamah – Kingdom of Bahrain
Type: Swimming Pools and Tanks Waterproofing
Date: Feb 2008

Project Description:

The **Bahrain City Centre** (pictured) is the largest retail development in the country, covering an area of 450,000 sq meters.

Wadi Rum Décor have commenced waterproofing of the biggest indoor/outdoor **water park** facility in the Middle East for their client, Mujid Al Futtaim, developers of Ski Dubai.

The specifiers chose spray-applied **RADCON Formula #7** for its unique ability to re-seal future hairline cracks and fast application.

Materials:

RADCON Formula #7, penetrating waterproofing material which reacts with the concrete and waterproof the top 10-20mm deep layer against water absorption.

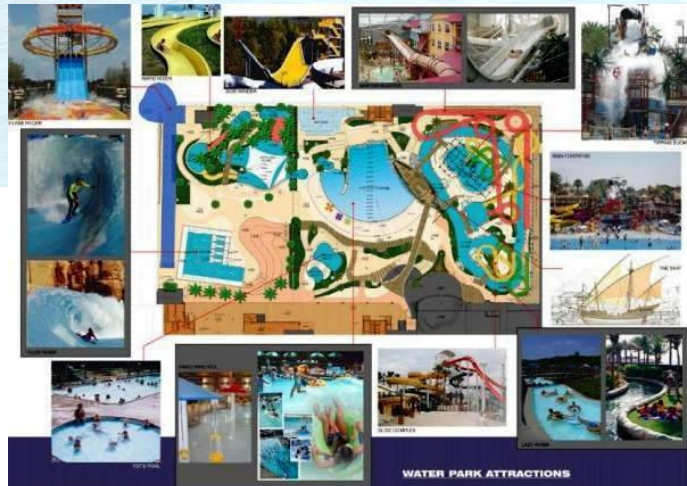

Project Value:

Dhs. 1,000,000.00

Work Description:

The concrete was prepared by hi water jetting machines and the joints such as kickers, pipe penetrations treated with a cementitious bandage material with reinforcement. Then the RADCON Formula #7 was used on the whole surface.
